INMAGIC® Presto.
for DB/TextWorks

ADVANCED WEB PUBLISHING FOR DB/TEXTWORKS

Presto for DB/TextWorks is a powerful and flexible new solution for publishing your DB/TextWorks textbases to the web (Internet or intranets). Presto for DB/TextWorks allows you to continue to build and maintain your textbases in DB/TextWorks, and publish that content to the web via a specific version of Inmagic Presto. With Presto for DB/TextWorks, customers gain powerful features that are either unavailable in *WebPublisher PRO* (the traditional means of publishing textbases to the web), or would require extensive time and money to build in *WebPublisher PRO*. Some of the advanced capabilities found in Presto for DB/TextWorks include:

- Automatic search across **all** textbases

- Faceted search

- Robust homepage design tools to make your knowledge repository informative and visually appealing

- Browsable taxonomies that create easy-to-use information pathways to critical information

- Content actions including InfoCart with email, save and print options

- Social Knowledge Network features to highlight and refine content, such as comments, tags and ratings

- Events capturing, including usage search statistics

- Many additional/optional features such as:

  — SharePoint integration

  — Federated Search

  — Active Directory integration

  — Blogs/discussion forums

  — Integration with third-party authentication systems, and more

Wow your users with a Presto for DB/TextWorks homepage

Presto for DB/TextWorks is a version of **Presto** specifically adapted to publish content from DB/TextWorks textbases.

Datasheet

RUN IN-HOUSE OR IN THE CLOUD
Choose the version that is right for you.

PRESTO FOR DB/TEXTWORKS CLOUD

The Presto for DB/TextWorks Cloud Service allows you to access all the power of Presto, and eliminates technical headaches. We run Presto for DB/TextWorks in our state-of-the-art hosting center, and you simply run DB/TextWorks on your PC or network.

All you need is an Internet connection, and to install a synchronization component on your PC or network. This component will keep your local DB/TextWorks and cloud-based Presto in synch and up-to-date.

This service is available by subscription, which includes keeping your copy of DB/TextWorks under maintenance.

SOFTWARE INSTALLED AT YOUR SITE

The Presto for DB/TextWorks software allows you to install and run the program at your site, on your hardware. Presto for DB/TextWorks includes a connector that synchronizes new, modified, and even deleted content in your textbases with Presto. The connection can use *WebPublisher PRO* or the free WebPub Runtime application to enable Presto for DB/TextWorks to communicate and synchronize with your DB/TextWorks textbases.

Enable your users to search across all your textbases at one time and take advantage of faceted search with Presto for DB/TextWorks
